🎯 Summary

I'm a graduated engineer in Information Science and Engineering possesses a deep understanding of software systems. They are equipped to design develop, and implement innovative solutions across various technological domains, ranging from software development to network infrastructure. Their expertise lies in problem-solving, coding, system analysis, and project management, making them valuable assets to tech industry.

💼 Experience

- **Intern**
  Genesis Training Center.

⚙ Project Experience

Hybrid System for Detecting Diseases on Banana Plant Leaves with Suitable Pesticide Recommendations [KSCST Selected]
Developed AI-driven hybrid system for banana leaf disease detection and pesticide advice.

Grocery Management System
Actively contributed to the development of e commerce website.

Tourism Management System
Actively contributed to the development of tourism website.

Telecom Billing Management System
Efficient system for managing telecom billing processes, ensuring accuracy and reliability.

Age Calculator
Instantly calculate age with precision using intuitive user-friendly interface.
